the next section we're going to look at is the reading. but the thing is, a japanese learners doesn't simply memorize kanji that they see. japanese learners have a method where they look up kanji in books and use them as examples. then, they look up the readings in the right context and use them in a sentence. this way, you can make sure that you've got the kanji, the reading, and the context all together. kanji master n4 is a fun challenge that can help get your memory sharpened. this is a relatively short test that tests the upper limits of your abilities. it keeps going down a little bit until you've seen all of the questions. the test is a 10 point series of tests that differ by level of difficulty. the app is very well laid out, and the format is generally simple. the app has a nice little summary of each of the answers, and there is a checkbox that will show you how many correct answers you got out of the 10 in the test. quite simply, it's amazing. if you're at all interested in kanji, you have to have this. if you simply want to know how well you know kanji, then i guess it's an expensive way to check (around \$20 or so). this test is fairly long. and the test is pretty good. actually, it has a pretty interesting system to it. you start at 3 and slowly get more difficult each time. every time you get a question wrong, you lose 1 point, which makes it very easy at the start, and much more difficult as you move along. it's a pretty decent test. more than one of the questions are multiple choice (which is generally a good thing), and the app can be a little slow to pop up the right answer, but it's more of a consistent issue. 5ec8ef588b
